Abstract (en)
A wall parapet construction for a cavity wally. The construction comprises a series of Capping Units 11 a top course of bricks 12 13 for the inner and outer leaves and an interlocking member 14. The interlocking member 14 is elongate and consists of a support 15 a wire mesh 16 and a pair DPC sheets 17 18. The support 15 is made of a plastics material and has a generally A-shaped cross reference section with an additional base section in the form of a pair of outwardly extending flanges 19. The mesh 16 extends into the mortar joint between the top course of bricks and the capping unit while the DPC sheets 17 18 extend into the mortar joints between the top two courses of bricks.
