Abstract (en)
[origin: WO8908175A1] Arrangement of an adjustable tilting limiter with or without device to prevent raising in association with a mounting tube (2) for roller blinds, preferably for models with a tilting device, in which the tilting limiter mechanism (6) is incorporated in the region of the mounting tube (2) and comprising a mounting trough (4) open on one side and closed at the rear by a mounting plate (3), with a pillow block (5) in which the adjusting mechanism (6) for the actual tilting mechanism is pivotally mounted. The mounting tube (2) is connected to either side of the mounting trough by short tubular connecting pieces (7) which can be connected telescopically to the actual mounting tube.
