Abstract (en)  
[origin: WO8909598A1] Platinum complexes of the formulae  $[Pt(am)_2CIR'R''SO]X$  and  $[Pt(am)_2SO_4R'R''SO]$ , wherein (am)<sub>2</sub> represents a bidentate amine, R' and R'' are different organic groups and X is an anion, exhibit favorable anti-tumor activity in vivo against tumors susceptible to therapy with platinum.
