Abstract (en)

Method and apparatus (100) for heat-treating at least one metal wire (1), characterised in that the wire (1) is passed through at least one pair of heat transfer plates (2, 2a, 2b), between two grooves (8, 8a, 8b) made in the two plates (2, 2a, 2b) of each of these pairs, it being possible for the separating distance (E) between the plates to vary, the wire (1) being directly in contact with a gas (11) practically devoid of forced ventilation arranged between the grooves (8, 8a, 8b). Metal wires (1) obtained with this method and this apparatus (100). <IMAGE>

Abstract (fr)

Procédé et dispositif (100) pour traiter thermiquement au moins un fil (1) métallique caractérisés en ce que l'on fait passer le fil (1) dans au moins un couple de plaques (2, 2a, 2b) de transfert thermique, entre deux rainures (8, 8a, 8b) pratiquées sur les deux plaques (2, 2a, 2b) de chacun de ces couples, l'écartement (E) entre les plaques pouvant varier, le fil (1) étant directement au contact d'un gaz (11) pratiquement dépourvu de ventilation forcée disposé entre les rainures (8, 8a, 8b). Fils (1) métalliques obtenus avec ce procédé et ce dispositif (100).
