Abstract (en)  
[origin: EP0410328A1] The invention relates to a joint strip (2) for sealing cross joints in concrete construction, consisting of an extruded profile (4) made of plastic or rubber and having strip-shaped stiffening elements (8) extending transversely to the profile longitudinal direction and arranged at a distance from one another. The stiffening elements (8) are embedded in each case in the region of their two ends (10) regionally in the profile (4) and extend, in the region lying between the embedded ends (10), over a surface (12) of the profile (4). <IMAGE>
