Abstract (en)

[origin: EP0410347A1] The invention relates to a joint strip (2), in particular an inner construction or expansion joint strip, for sealing off joints in concrete construction, comprising an extruded profile (4) of plastic or rubber having at least two side webs (8) to be embedded in the concrete, the profile (4) being connected along the longitudinal edge (14) of at least one of the side webs (8) integrally and/or interlockingly to an edge strip (24) running in the longitudinal direction of the profile, and the edge strip (24) has binding wire mountings (26), spaced apart in the longitudinal direction of the profile. <IMAGE>
