Abstract (en)  
[origin: EP0410915A2] The invention relates to a pallet-mounted case which will apply particularly to the field of packaging. The pallet-mounted case (1) is formed from a rigid platform (2) of quadrilateral shape, mounted on runners (3). A container (4) is attached to the platform (2) and, according to the invention, this container (4) is formed from independent flanks, fixed on the rigid platform (2) and juxtaposed at the periphery of the said platform (2) so that their contiguous sides are connected by at least one assembly element (9-12; 18). According to one embodiment, the assembly elements are in the form of corner brackets (9-12) arranged in the angle formed by two flanks (5-8). In another embodiment, the assembly element is in the form of a belt (18) whose perimeter corresponds substantially to the periphery of the platform. The invention relates principally to the cardboard-packaging industry. <IMAGE>
