Abstract (en)
A spreadable material package includes a first (18) and a second (20) sheet joined together to form a chamber (12) for holding the spreadable material. The package includes a spreader portion (14) at one end that is in flow communication with the chamber (12) so that spreadable material can flow from the chamber to the spreader portion. The package includes a stiffening portion (21) having spaced apart indentations (25, 27) for providing a stiffening effect to the spreader portion.
