Abstract (en)

[origin: EP0411372A2] There is described a formable textile material comprising a textile sheetlike structure, characterised in that the sheetlike structure consists of at least two different kinds of polyester yarns, at least one of the yarns having a heat shrinkage at the boil of at least 45 %, preferably at least 60 %, and at least one of the yarns having a heat shrinkage of not more than 10 %, preferably not more than 5 %, in the unshrunk and in the shrunk state, also the resinated formable textile material, and a dimensionally stable net material produced therefrom. <??>Processes for manufacturing these articles are also described. <IMAGE>
