Abstract (en)
In a kayak or canoe paddle, the paddle handle includes a handgrip 24 the longitudinal axis of which is inclined to the longitudinal axes of the tubular handle portions 30, 31 to which it is connected. The handgrip 24 is separately preformed from the rest of the handle, for example is injection moulded from plastics, and is provided at its end with spigots 28, 29 which engage within the ends of the tubular handle portions and are secured by adhesive and/or rivets. The handgrip 24 may be moulded in two separate parts which are bonded together along a longitudinal plane.
