Abstract (en)
[origin: EP0412198A1] An extrusion tool (10) is provided for forcing out pasty masses from a cartridge (11) and contains an advancing mechanism (18) or a pneumatic pressure device in a housing (17). The cartridge (11) is inserted into the rear end of a cartridge container (13) and the latter is attached to the housing (17) with a quick-release closure (16). For cartridges of different sizes and shapes it is merely necessary to use a correspondingly adapted cartridge holder (13). Furthermore, the extrusion tool can be used without modification for all types of cartridge. <IMAGE>
