Abstract (en)
[origin: EP0412480A1] Described is a device for filling containers with a liquid, having a hollow cylinder which is moveable at least over the upper part of the containers into the filling position and the inner wall of which surrounds the containers. <??>According to the invention, a seal (22) for sealing the interspace (20) between container (26) and the inner face of the hollow cylinder (2) is provided on the inner wall (18) of the cylinder (2), the seal preferably consisting of elastic and/or flexible material and being able to be pressed against the container by a pressure medium for the sealing. <IMAGE>
