Abstract (en)
[origin: EP0413208A2] The invention relates to an insertable module with a cooker panel for installation in cookers. To make possible preassembly of a cooker panel with all assemblies to be provided there as well as the predeterminable electromagnetic compatibility of these assemblies and to minimise the wiring outlay of these assemblies in a cooker, it is envisaged to construct the cooker panel as part of a module-type housing, which has all the assemblies to be operated from the cooker panel, displays, the entire control electronics and all the wiring of the assemblies. This module is supplied to the cooker manufacturer as a finished device, equipped with components in advance and prewired. <IMAGE>
