Abstract (en)

Transport vehicle (1) with a loading space provided with a loading opening (2) and a container unloading device (4) which comprises a lifting device for picking up a container (10) and raising thereof to the loading opening, wherein the lifting device has a hydraulic driving controlled by an electro-hydraulic control device. Along at least a portion of the edge of the loading opening (2) is arranged a pressure-sensitive switching member (14) which is coupled to the control device such that at activation thereof the hydraulic driving of the lifting device is switched off.
