Abstract (en)

[origin: EP0413659A1] In order, in an installation having movable motorised rail-guided units, especially for articles to be set thereon, such as parked motor vehicles, to avoid expensive line systems for the drive current of the motorised units equipped with electric drive motors, and to keep the space above the parking areas of the motorised units free, at least one bare strip conductor (60) for drive and control current of the motorised units is arranged next to one or both rails (48) of one or each of a plurality of tracks for the motorised units, and the motorised units are equipped with current collectors held in contact with said strip conductor (60). <IMAGE>
