Abstract (en)
[origin: EP0413986A1] A container carrier for four or more containers arranged in two rows has a covering surface (2) covering the containers, side walls (3, 4) arranged on said covering surface, and bottom wall portions (5, 6) which are linked in each case to the side walls and one of which is provided with a wall portion (7) which is folded in an inverted U-shape and consists of three walls. Tabs (11, 12) are punched out of the two side walls (8, 9) of the U-shaped portion, which tabs are located opposite one another and engage between two adjacent containers. <IMAGE>
