Abstract (en)

Device for attaching a shaft in a frame, characterized in that it essentially consists of, on the one hand, at least two supports (3) to carry the shaft (1) at its ends (4), and on the other hand, at least at one support (3) a lock (5) which in its closed position keeps the shaft (1) on its support (3) while it can turn locally, and a hinged blocking mechanism (6) for the lock (5).
