Abstract (en)

[origin: EP0414992A1] The invention relates to a filling spout or bung for flexible containers or pouches made of a polyethylene (PE) or the like having a bung part and a flange part. In the case of such filling spouts, the bung part (3) is formed from a dimensionally stable plastic having adequate heat resistance for steam sterilisation and has a flange part (5), which consists in at least an outer layer of a polyethylene, for welding to the flexible container or pouch (2) or to a ply of the pouch suitable for this. <IMAGE>
