Abstract (en)
"IMPROVED HINGE" consisting of two sections, an internal one (11) of circular cross-section mounted directly on the door (10) and an external one comprising two semisections (12) and (15) which are mounted on the vertical jamb of the door, window or the like (13). On the head (32) an attachment (17) is fitted which matches up externally with section (12). Fitted inside and at the top end of section (11) is attachment (18) and at the bottom end the tapering washer (24) which has a hole (24a) in the middle and is welded to the bottom edge of section (11).
