Abstract (en)
[origin: EP0416278A2] A creped cellulose tissue paper is described which has a lignin content of 3 - 6 % by weight. The dry tear resistance in the running direction of the machine is 7.5 - 9.0 N/50 mm. The tissue paper is distinguished by good tactile softness. In an improved embodiment, the paper contains 5 - 30 % by weight of unbleached sulphite pulp, the remainder being unbleached sulphate pulp. In this form, the paper has a neutral odour both in the dry and in the wet state.
