Abstract (en)

[origin: EP0416328A1] Burning element, especially for candle-shaped lights, consisting of a can which can be filled with liquid fuel and has a wick, which projects at the top side and is guided in a guide tube inserted centrally in the top side and whose lower end reaches to the bottom of the can. In order for it to be possible to refill the burning element easily with fuel, the top side of the can (1) is constructed as a lid (2) which can be unscrewed and is provided with a central passage into which the guide tube (4) with the wick (3) is inserted. <IMAGE>
