Abstract (en)

[origin: EP0416356A2] In a device for producing steel strip, the steel strip cast in a mould is passed into a horizontally arranged driving and levelling device and then into a temperature equalising furnace. <??>To prevent the steel strip (1) running sideways in the temperature equalising furnace (3), an aligning station (11) for the steel strip is arranged between the driving and levelling device (8) and the temperature equalising furnace (3).
