Abstract (en)

[origin: EP0416792A2] An access control device in the form of a programmable electronic 'key' 33 is provided, especially for use in hotels, for allowing access to restricted access areas, e.g. hotel rooms protected by programmable door locks. The electronic 'key' 33 is provided with a paging device for receiving paging signals whereby messages 25 may be transmitted to the holder of the 'key' 33.
