Abstract (en)

[origin: EP0416964A2] The invention relates to an assembly of reinforcing elements for reinforced concrete products, this assembly comprising a plurality of spaced-apart rigid transverse reinforcing elements (12) and at least two longitudinal flexible elements (14) joined to the transverse reinforcing elements in order to keep them spaced apart at chosen intervals. An assembly is thus obtained which may be easily packaged. The invention also relates to a method and a device for manufacturing this assembly of reinforcing elements. <IMAGE>
