Abstract (en)

[origin: WO8912148A1] A support column for mounting a platform (5), such as a balcony platform, on a wall (1), comprises mountings (3, 4) for mounting of the platform, and fittings (12, 13, B5, M5) for substantially vertical fitting of the support column on the wall. The support column consists of a pipe (2) having a flat surface for engaging the wall (1). The pipe (2) comprises fixing means (10, 11) which are adapted to fix the mountings (3, 4) to the pipe (2) on a vertically variable level. The fittings (12, 13, B5, M5) comprise a slot (12) extending through the pipe substantially parallel to the flat surface, and a bar (13) which is inserted in the slot (12) and adapted to be fixed to the wall (1) on both sides of the pipe, and the height of which is considerably smaller than the height of the slot.
