Abstract (en)

[origin: WO8911489A1] An immunogenic human interleukin-3 (IL-3) peptide is provided from which monoclonal peptide antibodies can be produced. The peptide of the invention corresponds to an interior subsequence of the IL-3 protein. The invention also includes conjugates of the immunogenic peptide and carriers, and monoclonal antibodies specific for the immunogenic peptide.

Abstract (fr)

Peptide immunogène de l'interleukine-3 humaine (IL-3) à partir duquel on peut produire des anticorps peptidiques monoclonaux. Le peptide ci-décrit correspond à une sous-séquence interne de la protéine de l'IL-3. L'invention comprend également des conjugués du peptide immunogène et des supports, ainsi que des anticorps monoclonaux spécifiques pour le peptide immunogène.
