Abstract (en)

[origin: EP0417458A1] An apparatus for splicing decorative ribbons possesses a cutting element (upper part 10) and a counter-piece (lower part 20). Cutting element and counter-piece are movable relative to one another. The cutting element has a cutter bar (30) which is detachably fixed in the cutting element and is provided with metal cutting edges (31). As a result of the exchangeable metal cutting edges on the cutter bar, the apparatuses can be used for a longer time. <IMAGE>
