Abstract (en)
[origin: US5123544A] An arrangement for displaying flat bendable objects, especially sheet shaped record carriers comprises a horizontal bottom plate, at least two upwardly open elongated compartments for receiving of objects, two substantially vertical curved side walls extending so that they approach one another to define in the compartments two withdrawal openings located near one another at an outer edge of the bottom plate. The side walls have longitudinal portions which together form a one piece wall portion. The side walls also have rear extensions which extend rearwardly of the wall portion and form inner side walls. The inner side walls are turnable about axes extending perpendicularly to the bottom plate and are spring loaded in direction toward the compartments.
