Abstract (en)
[origin: EP0417703A2] The machining system for bar stock secured at one end in a chuck and fed into a bending machine. Before and/or after a bending operation, the work (7) is subjected to additional operations, such as stamping, drilling, cutting, pressing or parting off. There are pref. one or more additional machining heads (13) in front of and/or behind the bending head (8), which are movable w.r.t. the work.
