Abstract (en)

[origin: EP0418177A1] Double-lift dobby for looms, of the type in which the coupling members (7) articulated on the two ends of each balance lever (6) are intended, under the control of a selection system comprising a programmed actuating mechanism (30, 31) associated with reading and transmission elements (28-25), for interacting with movable pull members (9) carried by sinkers (10) driven in an oscillating movement, characterised in that the reading and transmission elements (28-25) are carried by the oscillating sinkers (10), so as to interact in turn with a retractable stop (30d, 34-35) of the actuating mechanism (30, 31) located at a fixed point. <IMAGE>
