Abstract (en)
A fuse load-disconnecting switch (1) which is provided with a casing with connections to (6, 6 min , 6 sec ; 3, 4, 5), and from (3 min , 4 min , 5 min ; 7, 7 min , 7 sec) the respective fuse-link cartridges (2, 2 min , 2 sec) which are dismountably provided in said casing, and in which at least one of said connections to the respective fuse-link cartridge is provided with a switch connection (3, 4, 5; 11; 3 min , 4 min , 5 min), and where the poles on the switch connections in the respective connections are provided serially, one behind the other, along a common operation rod (10) which influences the respective switch connections simultaneously. Operation rod (10) may be influenced, via a tilting mechanism (8, 8 min , 8 sec), by a manually actuatable operation handle (9).
