Abstract (en)

[origin: WO8909246A1] Solid shaped structure having a surface coated with crosslinked hydrophilic polymer, and process for preparing such structure, the coating being durable and exhibiting a low coefficient of friction when wet.

Abstract (fr)

On a mis au point une structure de forme solide comportant une surface recouverte de polymère hydrophile réticulé, ainsi qu'un procédé de préparation de ladite structure. Le revêtement est durable et présente un faible coefficient de frottement lorsqu'il est humide.
