Abstract (en)

[origin: WO8910706A1] Method for making modulatable garments by assembly pieces (1) presenting assembly lines (2) which reproduce a unique base pattern having the shape of a lozenge. The pieces are provided with attachment means (3) such as snap-fasteners arranged along assembly lines and are arranged with the lozenges having their long diagonal (D) oriented vertically. The top portion and the bottom portion of the garment are each formed of a row of four pieces defining for lozenges assembled by their tops situated at the extremities of the small diagonals.
