Abstract (en)
[origin: WO8911537A1] Anti-idiotypic antibodies against an antigen are produced by inoculating animals with antibody against the antigen and recovering the anti-idiotypic antibodies from body fluids. The process may also be used to produce antibody-secreting cells and immortalised cell lines. The cells and anti-idiotypic antibodies are useful in therapy and diagnosis.

Abstract (fr)
On produit des anticorps anti-idiotypes2 contre un antigène en inoculant des animaux avec un anticorps contre l'antigène et en récupérant les anticorps anti-idiotypes2 à partir de fluides corporels. On peut également utiliser le procédé pour produire des cellules sécrétrices d'anticorps ainsi que des lignées cellulaires immortalisées. Les cellules et les anticorps anti-idiotypes2 sont utiles en thérapie et diagnose.
