Abstract (en)

[origin: EP0418605A2] The invention relates to a luminous key switch having a supporting element (1) for holding a switch key (2). The luminous key switch is provided with an internal light source (4). In order that the internal light source can be replaced easily, it is provided according to the invention that the supporting element (1) and a contact connecting element (6) in each case have a recess (7, 7') in such a manner that the internal light source (4) can be inserted into the switch from the side of the switch opposite the switch key (2). <IMAGE>
