Abstract (en)
[origin: CA2025092A1] The installation block comprises a self-supporting body (i) made of foamed concrete into which a flush tank (2) with an inspection opening (2a) is foamed. A spiral hose (3), which forms a discharge channel (9) which empties into the flush tank (2) at one end and leads at the other end outwardly to the front side of the installation block (1), is also foamed into the body (i). To attach a water closet with subdouche, a flexible connecting hose (4), which comprises at attachment piece at the bottom end and at the other end is connected directly to the inlet valve of the flush tank, is inserted into the discharge channel (9).
