Abstract (en)
[origin: WO9007564A1] Disclosed are liquid alkylphenyl poly(oxypropylene) aminocarbamates which do not form a wax when cooled to -40 DEG C in a 50 weight percent solution with toluene, said aminocarbamates having at least one basic nitrogen and an average molecular weight of about 600 to 6,000 and wherein the alkyl group is substantially straight-chain of from 25 to 50 carbon atoms. Also disclosed are fuel compositions and concentrates as well as lubricating oil compositions and concentrates containing said alkylphenyl poly(oxypropylene) aminocarbamates.

Abstract (fr)
On décrit des aminocarbamates liquides de poly(oxypropylène) alkylphényles qui ne se transforment pas en cire lorsque refroidies à -40°C, se trouvant dans une solution de 50 % en poids avec du toluène, lesdits aminocarbamates ayant au moins un azote de base et un poids moléculaire moyen compris entre environ 600 et 6000, et dont le groupe alkyle est formé d'une chaîne sensiblement droite comprenant entre 25 et 50 atomes de carbone. On décrit également des compositions et des concentrés de carburant de même que des compositions et des concentrés d'huile de lubrification contenant lesdits aminocarbamates de poly(oxypropylène) alkylphényles.
