Abstract (en)  
[origin: WO8912715A1] Textile fabric (10, 30) having a coating (20) thereon which imparts flame spread resistance and smoke suppressant properties to the fabric. The coating (20) comprises a film-forming polymer binder and an inorganic heat reflective filler material selected from the group consisting of natural and synthetic silicates and barites dispersed in and bound to the textile fabric by the film-forming polymer binder. A method of producing a pile carpet having such a coating is also provided.
