Abstract (en)
[origin: EP0419714A1] In a padded backrest with a lumbosacral support which can be adjusted in height and which comprises a backrest cushion (3) on a cushion panel (2) and, arranged between these, a lumbosacral support part (1), a simplified construction, together with improved function and increased seating comfort, is achieved by virtue of the fact that the lumbosacral support part (1) can be displaced in the vertical direction relative to the backrest cushion (3) and the cushion panel (2). <IMAGE>
