Abstract (en)
[origin: EP0421141A2] A clutch cooling apparatus for a stepless variable speed transmission having a clutch for transmitting driving power from an input shaft to an output shaft by clamping a friction plate connected to the output shaft between a pressure plate and an end plate connected to the input shaft, including a first clutch cooling means for cooling the clutch during a predetermined running condition of the vehicle and a second clutch cooling means for cooling the clutch during operation of the vehicle engine regardless of the running condition of the vehicle.
