Abstract (en)  
[origin: EP0421177A2] A running gear (17) is driven in a positively locking manner by a drive, a wire cable (10) or a chain (29), the cable or the chain (29) being surrounded by the profile of a rail support (5). The coupling between the drive means and the running gear (17) taking place preferably in the vertical plane (4) in which the centre of gravity of the running gear (17) is usually also located. <IMAGE>
