Abstract (en)
[origin: WO8912618A1] Describes alpha-beta ethylenically unsaturated poly(alkyleneoxy) compounds that display surfactant activity and that polymerize when used in the emulsion polymerization of ethylenically unsaturated monomers, including vinyl monomers.

Abstract (fr)
Des composés poly(alkylèneoxy)alpha-béta éthyléniquement insaturés sont tensio-actifs et se polymérisent lorsqu'ils sont utilisés pour polymériser par émulsion des monomères éthyléniquement insaturés, y compris des monomères de vinyle.
