Abstract (en)
[origin: WO9013498A1] A refuse bin comprises at least one holding device (12, 13) and at least one joint body with a vertical swivelling axis (23) which consists of two joint pieces (14, 16) and which can be attached, for example, to a side wall (19) of a compartment. One joint piece (14), which can be permanently attached to the side wall, has a projection (20) which extends vertically upward, e.g., a bolt or a pin, or a vertical recess. Said projection (20) can be releasably connected with a recess (22) of the holding device (12). Said vertical recess can be releasably connected with a projection of said device. The latter is designed as the second joint piece and can be suspended from above in the first joint piece.
