Abstract (en)

The invention relates to an information medium paper, such as newspaper, magazine, or advertisement paper, provided with a communication medium forming portion for use in making a communication medium, such as a postcard or a letter, a method of making such communication medium from such communication medium paper, and a core sheet for insertion in the interior of a communication medium forming sheet obtained by cutting the communication medium forming portion from the communication medium paper when the communication medium sheet is folded at least in two, and a label adapted to be mounted on the communication medium forming sheet. Any information written in the communication medium forming sheet can be concealed by folding the sheet double and/or by mounting the label thereon, whereby the information can be kept in secrecy-maintained condition and the need of an envelope is eliminated.
