Abstract (en)  
[origin: EP0425788A2] With the assembly according to the invention, flat parts 9; 10 can be released again simply and rapidly without damaging the profiled strips 1, forgoing outwardly visible covers for the locking elements. To this end, there is arranged on the inside of the profiled strip 1, to receive and fix the head 5 of the locking element 4, a back-engagement groove 2. A turning tool can be applied to the locking element 4 from outside, the locking element 4 being mounted in a discoid distance and connecting element 3. On the longitudinal sides of the distance and connecting element 3, a suitable recess 6 for application of a turning tool is provided. <IMAGE>
