Abstract (en)

The invention relates to industrial sewing work e.g. in a ready-made clothing workshop. For such an application the invention provides an industrial sewing system, comprising: an industrial sewing machine (1) provided with a motor, (2) particularly an electro-motor, said motor comprising an adjustable coupling for adjusting the operation speed of the sewing machine, a control pedal, (3) connected with the coupling by means of connecting means, (4) and a table (8) for supporting the sewing machine. Preferably the system is implemented such that the table comprises: a support structure, (5-13) a table top (8) supported by said support structure for supporting said sewing machine, height-adjusting means (11-12) for adjusting the height of the table top, and angle-adjusting means (22-23) for adjusting the angular position of said table top. s
