Abstract (en)
[origin: WO9011360A1] A hybrid protein containing sequences derived respectively from the MaE protein and the CD4 protein of the T lymphocytes. Said protein comprises more particularly the soluble N-terminal part of the CD4 protein. It is designed for use in the production of drugs for combatting AIDS.

Abstract (fr)
L'invention concerne une protéine hybride contenant des séquences respectivement issues de la protéine MaE et de la protéine CD4 des lymphocytes T. Elle comporte plus particulièrement la partie N-terminale soluble de la protéine CD4. Elle est destinée à la production de médicaments efficaces contre le SIDA.
