Abstract (en)

[origin: EP0426994A1] A stamped knitting tool for textile machines, especially knitting machines, with a shank (1) carrying at least one foot (2) and containing at least one free space which is filled with a vibration-damping plastic (8) and the plastic filling of which is connected firmly to the shank. <??>Starting from the shank upper and/or shank lower edge, the shank is provided, at least in regions, in its longitudinal direction with a slot-like depression (3), by which the free space filled with plastic is formed. <IMAGE>
