Abstract (en)

A food package container including a base (12) and a body (13) in alignment with a peelably sealed to each other is provided. At least one snap closure assembly is provided on the respective peripheral flanges of the base and body, and this snap closure assembly provides an audible snapping signal when the consumer recloses the food packaging container. The closure assembly includes an insertion projection (e.g. 21, 23), and an opening (e.g. 22, 24), in general registry therewith which is undersized with respect to the projection.
