Abstract (en)

[origin: US5064562A] Stable suspensions of zeolite particulates, in water, well adapted for detergency applications, have a pumpable low viscosity and include an effective viscosity reducing amount of a silicone resin and, advantageously, a suspension stabilizer, e.g., an alkaline earth metal cation or a biogum polysaccharide.

Abstract (fr)

L'invention concerne des suspensions aqueuses de zéolite. Ces suspensions à viscosité abaissée sont caractérisées en ce qu'elles comprennent une résine silicone. Elles peuvent être utilisées plus particulièrement dans la préparation de compositions détergentes.
